PROFESSIONAL EXPERIENCE

sharonchoe.com – New York, NY

May 2016 – Present

Front End Developer

- Sharonchoe.com is a Ruby on Rails application deployed on Heroku. The Front End is powered by AngularJS and Bootstrap UI
- **Projects:** Rails Blog, Simon Says, Tower of Hanoi, Pomodoro Clock, Yahoo! Weather API
 - **Ruby on Rails Blog**
 - Integrated Ruby on Rails backend and front end using AngularJS with custom HTTP services.
 - Generated models, views, and controllers from scratch using *Rails g* command line.
 - **Tower of Hanoi**
 - Classic game built in AngularJS. Implemented a stack to keep track of game logic
 - Wrote algorithm to solve game with minimum number of moves.
 - Used HTML5/CSS best practices to style view and integrated with AngularJS directives.
 - **Pomodoro Clock**
 - Productivity app written in AngularJS to demonstrate the Pomodoro technique.
 - Implemented algorithms to pause, start, and reset timers correctly using *\$interval* and *\$timeout*.
 - **Weather Forecast App**
 - App built on top of Yahoo! Weather API.
 - Used ng-repeat directives to display weather forecasts.
