TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React.JS, Express.JS, Node.JS, PostgreSQL/Sequelize, Git, HTML5/CSS3, jQuery, Bootstrap, Foundation, SASS, AngularJS, Ruby on Rails, Jasmine, Mocha/Chai, D3.JS, Firebase

PROJECTS

Pioneers of Mars | Full stack Developer | [github](https://github.com) | [firebase](https://firebase.com)

- Multi-player web app game that simulates the popular board game “Settlers of Catan”.
- Technologies used: JavaScript, React-Redux, Firebase, Material UI, react-hexgrid
- Utilized a realtime database to synchronous game moves to all players.

Advanced Word Counter | Full stack Developer | [github](https://github.com) | [heroku](https://heroku.com)

- Coded JavaScript algorithm that optimizes speed performance of nested word searches.
- Data was visually represented using vanilla JavaScript, D3, and Foundation CSS.

Carefull | Full stack Developer | [github](https://github.com) | [heroku](https://heroku.com)

- Built e-commerce store from the ground up using JavaScript, React-Redux, PostgreSQL, Express, and Node.
- Developed the authentication features by using cookie-session and designed database schema/relationships.

sharonchoe.com | Front End Developer | [github](https://github.com) | [heroku](https://heroku.com)

- Sharonchoe.com is a Ruby on Rails application deployed on Heroku; front end is powered by AngularJS.
- **Projects:** Rails Blog, Elite Nails, Pomodoro Clock, Yahoo! Weather API
 - **Ruby on Rails Blog**
 - Integrated Ruby on Rails backend and frontend using AngularJS with custom HTTP services.
 - Generated models, views, and controllers from scratch using *Rails g* command line.
 - **Elite Nails**
 - Local business website built in Node.JS powered by Express.JS and deployed on Heroku.
 - Front end is built using jQuery and Bootstrap; used reCAPTCHA to validate form inputs.
 - **Pomodoro Clock**
 - Productivity app written in AngularJS to demonstrate the Pomodoro technique.
 - Implemented algorithms to pause, start, and reset timers correctly using *\$interval* and *\$timeout*.
 - **Weather Forecast App**
 - App built on top of Yahoo! Weather API.
 - Used ng-repeat directives to display weather forecasts.

PROFESSIONAL EXPERIENCE
