PROFESSIONAL EXPERIENCE

Full Stack Academy (Grace Hopper Cohort) – New York, NY   **August 2016 – Present**
sharonchoe.com – New York, NY   **May 2016 – Present**
Front End Developer

- Sharonchoe.com is a Ruby on Rails application deployed on Heroku; front end is powered by AngularJS.
- **Projects:** Rails Blog, Simon Says, Tower of Hanoi, Pomodoro Clock, Yahoo! Weather API
  - *Ruby on Rails Blog*
    - Integrated Ruby on Rails backend and front end using AngularJS with custom HTTP services.
    - Generated models, views, and controllers from scratch using *Rails g* command line.
  - *Tower of Hanoi*
    - Classic game built in AngularJS. Implemented a stack to keep track of game logic
    - Wrote algorithm to solve game with minimum number of moves.
    - Used HTML5/CSS best practices to style view and integrated with AngularJS directives.
  - *Pomodoro Clock*
    - Productivity app written in AngularJS to demonstrate the Pomodro technique.
    - Implemented algorithms to pause, start, and reset timers correctly using *$interval* and *$timeout*.
  - *Weather Forecast App*
    - App built on top of Yahoo! Weather API.
    - Used ng-repeat directives to display weather forecasts.
